Current Revision History

This is a new document. It replaces the following document:

- *BUYPASS® Platform Issuer Identification Number (IIN) Reference Manual*, FDMS Doc. No. 0103, Version No. 2021-2, released on October 01, 2021

The following table lists added, updated, and deleted pages:

Note: Red text and change bars in the page margin indicate updated/added text. Deleted text is indicated only in the following table. Blue text indicates a link to another location in the text.

Changes Made to Version No. 2021-2 and Reflected in Version No. 2024-1			
Topic	**2021-2 P. No.**	**2024-1 P. No.**	**Summary of Change**
Visa Fleet PAN Range Update	NA	4	Updated Visa Fleet PAN ranges in Card Type Information—Table 1

Prior Revision History

Changes Made to Version No. 2021-1 and Reflected in Version No. 2021-2			
Topic	**2021-1 P. No.**	**2021-2 P. No.**	**Summary of Change**
JCB BIN Range Update	NA	3	Updated IIN length of Card Type 'JCB' to '8' in Card Type Information—Table 1
Discover 8-Digit BIN Range Update	NA	4	Added support of 8-digit BIN to Discover in the note of Card Type Information—Table 1

Introduction

This document discusses IIN information for the following card types:

- American Express
- Debit
- Diners Club
- Discover Network
- EBT
- Fleet One
- Fleetwide
- Fuelman
- JCB
- MasterCard
- MasterCard Fleet
- Visa
- Visa Fleet
- Voyager
- WEX

This document contains two tables.

- Table 1 contains the following information:
    - Card Type
    - Card Type ID
    - IIN Length
    - PAN Length
    - PAN Range—Low
    - PAN Range—High
- Table 2 contains the following information:
    - Card Type
    - Manual Entry
    - Encrypted PIN Required
    - IIN Entered

Card Type Information—Table 1

The following table lists each card type in alphabetical order, together with its corresponding Card Type ID, IIN Length, PAN Length, and PAN range:

Card Type Information—Table 1					
Card Type	**Card Type ID**	**IIN Length**	**PAN Length**	**PAN Range—Low**	**PAN Range—High**

				Note: Either First Data or WEX will determine if the payment card can be used at the merchant location.	

Support of 8-Digit BIN: Effective with the April 2022 release, Visa, MasterCard, and Discover will implement the change from six-digit to eight-digit issuing BINs to align with the new standard adopted by the International Organization for Standardization (ISO). Acquirers and processors must be able to support both 6-digit and 8-digit issuing BINs by April 2022. Issuers must be able to support eight-digit issuing BINs for new BINs requested after April 2022. First Data Acquiring platforms have been updated to support this mandate. In addition, the First Data Global BIN File has been updated to recognize Issuer BIN lengths greater than six digits. To ensure readiness, First Data recommends all partners carefully review these changes to identify any impacts and pay particular attention to any processes that utilize BIN information for processing purposes, such as Merchant Choice Routing, Merchant Loyalty (special discount programs offered to cardholders who execute “on us” transactions), Dual Branded BIN lists for mag-stripe transactions, and PIN bypass eligibility for mag-stripe transactions. Integrated Partners should ensure that their systems are able to properly handle these changes or incorporate the necessary action plans to achieve compliance by April 2022.

Card Type Information—Table 2

The following table lists each card type in alphabetical order, together with the following information:

- Manual Entry—Indicates whether manual entry can be used.
- Encrypted PIN Required—If a PIN (personal identification number) is entered, and this column contains a *Y* for the card, the PIN must be encrypted.
- IIN Entered—If manual entry for a card is supported, and the column contains a *Y* for the card, then no special processing is required to determine the IIN. If the column contains an *N* for the card, then special processing is required to verify the card number and append the IIN.
