Payment System Product Codes

September 4, 2015

Version 3.7

Abstract

This document describes the Payment System Product Codes recommended for use by electronic payment systems within the petroleum/convenience industry.

Introduction

From pay-at-the pump, to paperless transactions with vendors, to tracking consumer sales patterns through point-of-sale data, to not yet realized uses, technology promises greater business efficiencies for the convenience store and petroleum marketing industries.

Standards greatly facilitate the interoperability of technology applications. The Conexxus Retail Financial Transactions Committee, originally part of the NACS Technology Standards Project and then the Petroleum Convenience Alliance for Technology Standards, generated this set of recommended product codes. Subsequently, these Payment Product Codes were adopted as part of the X9 standard for terminal-to-host messaging (first TG-23 and later X9.104 Part 2). They have has been maintained sequentially by NACS, PCATS, and now Conexxus; Conexxus is the official Registration Authority, approved by ASC X9, Inc., to maintain these codes as part of X9.104.

These product code definitions are for use in electronic payment systems formats. Industry specific category/subcategory definitions and descriptions proposed by the NACS Category Management Project are incorporated in the listings. These codes define petroleum and merchandise products and services by assigning them a specific three-digit number. Host payment systems, along with vendors, are encouraged to adapt their systems to utilize these codes so that standard product definitions are maximized for the benefit of all users.

Conexxus maintains this set of product codes and updates them as necessary. In order to facilitate this maintenance and still provide maximum flexibility for individual vendors and networks to use these codes, two sets of undefined code categories exist. The first is for the exclusive use of Conexxus in making future changes. The second is for the proprietary use of the vendor community to add codes outside the adopted list. Notwithstanding such private use opportunities, Conexxus encourages vendors to submit new generic product codes so that the list may reflect the most up-to-date codes in use throughout the industry and continue to achieve the goal of standard product definitions.

Deprecation

A number of product codes were deprecated in Version 3.5. Deprecated code values may be reused by Conexxus in future versions of this document. Therefore, vendors and

Copyright © CONEXXUS, INC., 2008-2015, All Rights Reserved

host networks should plan to modify systems to use alternate codes. Direct any feedback on deprecated codes that would require reconsideration to info@conexxus.org.

Versioning

Because this version is backwards compatible, it is considered a minor release and will become version 3.7. When the deprecated product codes are reused it will no longer be backwards compatible and a major release revision will occur.

Release Notes for Version 3.7

- Added offroad (non-taxable) gasoline (3 specific grades, 2 generic grades) codes 325-329)
- Added 90 Octane Recreational Fuel (330)
- Added Hydrogen H35 (331) and Hydrogen H70 (332)
